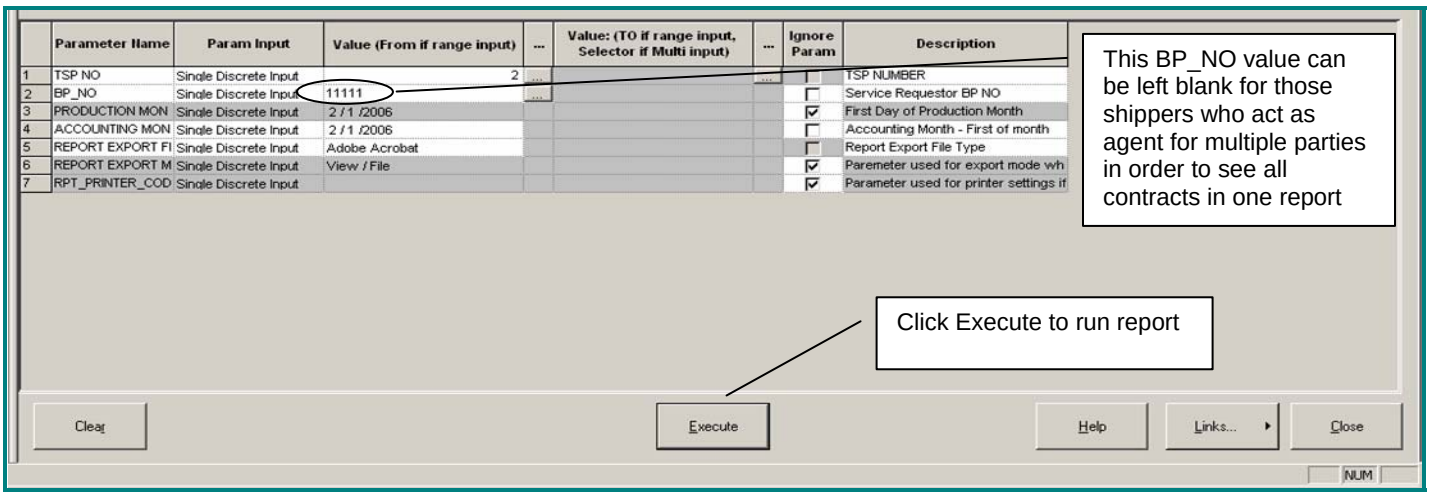
INX40 – Daily Imbalances – Shows Daily Detail

The primary purpose of this report is to help manage contract imbalances. This report displays (by contract) the daily allocated net supply, daily confirmed deliveries, daily imbalance, and a running cumulative imbalance. This report typically has a 2-day lag time on volumes. NOTE: We recommend always using the Accounting Month parameter and ignoring the Production Month parameter. For our report purposes, the Accounting Month and the Production Month are considered the same. Please keep in mind that the Production Month defaults to the current day.



Run Date/Time: 3/1/2006 8:48:34AM

TSP: 2 Enogex Gas Gathering LLC
